

RAMONA COMMUNITY TRAIL DESIGN & MANAGEMENT GUIDELINES

Countywide Community Trails Master Plan (CTMP) guidelines apply to all community and subregional plan areas. Community-specific information contained in this section is intended to accommodate specific needs of this community. Where there are differences between countywide guidelines and community-specific guidelines contained in this section, the community guidelines will take precedence. Where design or management guidelines are not addressed, the Countywide CTMP guidelines shall apply.

COMMUNITY CHARACTER STATEMENT

The community of Ramona is located in the foothills of San Diego County. Pioneers with a rich history of ranching founded it as a prominent stopover for many heading to Julian and beyond. The Butterfield Stage ran through the region. Main Street is unique for having been constructed very wide. Wagons of forgone times had the ability to do a u-turn. Before the Battle of San Pasqual, Kearney and his soldiers rested here beneath the oaks near Highland Valley Road. We refer to Ramona as Valley of the Sun. Coming into Ramona, north on Route 67 by Mt Woodson, it is obvious why, as you drop into a vast valley surrounded by mountains of National Forest. The Santa Maria Valley is home to people who strive to live a rural, country lifestyle. Important to Ramonans is the opportunity to raise their families and livestock on large parcels. Horses are a major part of that lifestyle. It has been shown that the local economy is impacted by conservatively \$24 million annually by the equine industry. Between 8,000 and 12,000 horses reside here. More equestrians are looking to relocate to Ramona from other communities because of the opportunities for pursuing an equestrian lifestyle. Our 4-H and Future Farmers of America (FFA) programs are important to this community, encouraging our young people to consider careers in agriculture.

Our valley features a variety of environments. The Santa Maria Creek runs through the region, coming from the mountains to the east, through Town Center, the grasslands, and on down Bandy Canyon to connect to the San Dieguito River. There are oak groves, stands of eucalyptus

and sycamores. We have a significant inventory of vernal pools and grasslands, which are vital to many species of animals, some endangered or threatened by development.

There are pioneer trails throughout the community. Only a very few have been preserved by dedication thus far. The vision of Ramona Trails Association is to provide a comprehensive trail system that connects all parts of the community. We seek to achieve a trails system that will provide safe, non-motorized routes to schools and public facilities helping to reduce motorized traffic and encourage a healthier mode of transportation.

There is a national health crisis of obesity and heart disease in our country, from our youth to our senior citizens. Trails provide a low-impact exercise opportunity to get away from our televisions and computers and walk a trail. There is a stronger sense of community when neighborhoods are connected with a trail. It has been shown that mental and social well-being is increased by the ability to experience a dirt path. These greenways provide wildlife corridors and buffer zones. Persons with disabilities are able to share trail experiences, whether by wheelchair or astride an equine. Everyone benefits from trails and pathways.

There are a number of organizations that would benefit from a comprehensive trail system, including several equestrian groups, 4-H, a burgeoning high school agriculture program, Future Farmers of America (FFA), amateur radio, school children for field studies in science and history, orienteering and many youth groups. Ramona is a destination for many bicyclists. Ramona Trails Association (RTA) is the leading organization dedicated to preserving trails in our area. RTA works with local and county agencies to create a trails system in Ramona. This service group participates in many community events including the Ramona Rodeo, July 4th Rotary Fireworks, and the Country Fair. Annually RTA has a fundraising multi use Poker Ride that is very well attended by horseback riders, mountain bikers, and hikers from all over the region.

With our close proximity to the National Forest and other popular recreational venues such as the San Dieguito River Park, Trans-County Trail a.k.a Sea-to-Sea Trail, and the County Open Space Preserves such as Mt. Gower, Simon Park, Barnett Ranch, and San Vicente Highlands, our community can benefit from eco-tourism. It has been proven that properties located adjacent or near a trail have greater value and tend to sell faster.

This community has looked at creating a Parks Authority, which would help to provide construction and maintenance of trails and the public parks they would connect. Ramona Trails Association currently provides part of this service.

As the County of San Diego continues to grow, the community of Ramona strives to retain its rural character. A viable trails system will help to achieve that goal. With such a large population of equestrians it will enhance that way of life. A connective trails system will provide our residents safe and healthy means to get from one place to another while preserving our rural lifestyle.

THE NEED FOR TRAILS

Ramona's population was recorded in the 1997 US Census at 32,325. This population status was used to determine the current trail need in Ramona utilizing an equation established by the Trail System Assessment (TSA) in 2001, which identified a minimum baseline level of service for each community by population. The Baseline Level of Service or Trail Need is 0.8 miles of trail per 1,000 people (Baseline or Trail Need = population /1,000 x 0.8). Please refer to CTMP section labeled "The Need for Trails" for additional information about the baseline level of service.

The statistics discussed in the **Table 1** below includes both trails and pathways in Ramona. Using the baseline level of service as a guide, Ramona's population indicates a current need for 27 miles of community trails and a future need for 44 miles of community trails in the year 2020.

Table 1: Ramona Baseline Level of Service

Category	Miles
Existing Trails	12
Current Baseline	27
Future Baseline in 2020	44

The Ramona Trails Plan, as indicated in the **Table 2** below, contains Priority 1, 2, and 3 trails. When the community developed this plan, their target mileage for combined Priority 1 and Priority 2 trails was above the baseline level of service for year 2020, which is 44 miles. The Ramona Trails Plan currently reflects a combined Priority 1 and 2 total of 63 miles and the Priority 3 trails total 181 miles. The overall prioritized mileage is 244 miles. The community trail/pathway mileage calculations below are based on the Ramona GIS digitized maps.

Table 2: Ramona Community Outreach - Prioritized Trails

Category	Miles
2020 Baseline (Priority 1 & 2)	44
Priority 1 & 2 on Map	63
Priority 3 identified on Map	181
Total Prioritized Mileage on Map	244

GOALS, POLICIES & IMPLEMENTATION STRATEGIES

Ramona does endorse the Countywide Goals, Policies and Implementation Strategies. Please refer to CTMP section labeled "Goals & Policies". As a result of the 2002 CTMP Outreach, Community Specific Goals Policies and Implementation Strategies developed.

The following are countywide CTMP abbreviations for your convenience:

CG = Countywide Goal

SG = Community Specific Goal

CP = Countywide Policy

SP = Community Specific Policy

CIS = Countywide Implementation Strategy

SIS = Community Specific
Implementation Strategy

Please refer to CTMP section labeled “Goals & Policies” to be used in conjunction with these Community Specific guidelines below.

Goal: SG 1

Expand Ramona’s pathway system to provide convenient and safe connections with the community trail system.

Goal: SG 2

The community will seek support of property owners when important trail connections are needed, the community will seek support of the affected landowner and encourage their voluntary participation.

Policy: SP 1

New pathways are to have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater.

Implementation Strategy: SIS 1

New pathways that provide critical connections to the trail system will be identified and added to the CTMP for future implementation.

Implementation Strategy: SIS 2

Where trails or pathways are required as a condition for development, they should be designed to connect with existing and proposed trails or pathways adjacent to the property.

Implementation Strategy: SIS 3

The community will encourage utility providers to allow public trail easements over their utility easements and rights-of-way.

Implementation Strategy: SIS 4

Review tax default properties and other County properties being sold for easements vacates, for potential opportunities to secure trail routes.

Implementation Strategy: SIS 5

Encouraged Caltrans to provide pathways that are identified on the community trails map within their controlled right-of-way.

Implementation Strategy: SIS 6

Continue to seek support from property owners for pathways along existing private roads when important connections are needed.

DEVELOPMENT AND MANAGEMENT GUIDELINES

Ramona does endorse the Countywide Trail Types and Design Guidelines. Please refer to CTMP section labeled “Development Guidelines” to be used in conjunction with the **Ramona Trail Design Guideline Matrix** below.

RAMONA TRAIL DESIGN GUIDELINE MATRIX

GUIDELINES	NOTES	NOTES	TYPE A	TYPE B	TYPE C	TYPE D
			Urban/Suburban	Rural	Primitive	Pathway
	Tread Width	1 a b c d e	10' - 12'	8' - 10'	4' - 6'	15'
	Easement Width	2 3 6 g	12' - 20'	10' - 20'	30' - 50'	10' - 15'
	Function		Recreation/ Transportation	Recreation/ Transportation	Remote Recreation	Transportation/ Limited Recreation
	Slope	4	< 15%	< 20%	< 40%	< 15%
	Cross Slope		1 - 2%	1 - 5%	1 - 8%	1 - 2%
	Surface Material		D.G./ Binding Agent	D.G. or Suitable Native Soil	Suitable Native Soil	D.G./ Binding Agent
	Anticipated User Volume		Hi	Medium	Med - Low	Hi
	Horizontal Clearance	5	2' Beyond Tread Edge	At Edge	1' Beyond Tread Edge	At Edge
	Vertical Clearance	f	12'	10'	10'	12'

Countywide CTMP Guideline Notes:

- 1) Tread width within the *optimum range will be based on site specific conditions.
- 2) Easement width within the *optimum range will be dependant on topographical or environmental conditions, i.e. steep slope, rugged terrain, rock outcroppings, or sensitive biological resources or habitat will require the maximum easement width.
- 3) The *optimum easement width for any class of trail identified as "Regional" is 20' - 50'.
- 4) These are *optimum slope ranges. The following additional criteria can be applied to Type A and B trails if warranted by site conditions.
 - Ideal : 0% - 5%
 - Acceptable: Average running slope of 10% or less, for distances over 200ft.
 - Acceptable: Average running slope of 15% or less, for distances under 200ft.
 - Acceptable: Average running slope of 20% or less, for distances under 100ft.
 - Sufficient switchbacks should be provided to avoid excessive slopes
- 5) Type B trails at 4 feet shall provide horizontal clearance 1 foot beyond tread edge to a minimum height of 3 feet .
- 6) Pathways are trails within road right-of-way. The minimum width specified corresponds to the current minimum parkway (aka pathway) width in the County Public Road Standards. Depending the on discretionary project being contemplated, an additional 5 feet of road right-of-way may be required, thus providing a total width of 15 feet for pathway / parkway purposes.

Ramona Guideline Notes: (Shaded Areas Represent Augments to the Countywide CTMP Guidelines)

- a) Exceptions to tread widths are acceptable for short distances where constraints occur i.e.. topographical, environmental, or archeological.
- b) 8' Minimum tread width is acceptable for trail type A for short distances from exceptions mentioned in note (a) above.
- c) 4' Minimum tread width is acceptable for type B for short distances under 20' from exception mentioned in note (a) above.
 - 8' - 10' tread width is recommended for public safety when 3 user groups are expected to share a trail in areas where barriers the trail has physical barriers such as fencing.
 - 6' - 8' trail tread where **no** physical barriers exist for sections of trail longer than 20', the trail shall be 8'-10' and a minimum of 4' is allowable for very short segments where topographical situations prohibit recommended width.
- d) Costs for construction and mitigation for trails in Ramona may be slightly higher because of variances from Countywide Design Guidelines, i.e. increased widths etc....
- e) Type C trails: 2' is an acceptable minimum where constraints such as topographical, environmental, archeological or where user groups are restricted.
- f) Optimal pathway/ Type D trail is one having vertical separation from the roadway but implementation is often limited by road right-of-way widths, topographic conditions and increased construction cost.
- g) Pathways/ Type D trails are to have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater

* "Optimum" means the best or most favorable condition for a particular trail situation from the perspective of responsible management.

COMMUNITY IMPLEMENTATION INFORMATION

The Ramona Trails Association (RTA) is the leading organization dedicated to preserving trails in Ramona. RTA works with local and county agencies to provide construction and maintenance activities. The Ramona community is considering creating a Parks Authority, which would not only provide construction and maintenance of trails, but also public facilities within local parks.

RAMONA TRAILS MAP SUMMARY

As a result of the CTMP community outreach process Ramona completed several tasks, which produced a community trail map. During this process they reviewed, identified and prioritized community trails and pathways as well as their special features. Each trail and pathway was labeled and recorded producing a trails map and index, which was delivered to the County (**Appendix A**). The County reviewed, formatted and incorporated the community trail information into the CTMP.

GIS Map Revisions

RAMONA TRAILS MAP INDEX

The following is the original (unchanged) trail map index completed by the community of Ramona for future reference. A total of 100 trail and pathway segments are identified in the boundary of Ramona. While this index was unchanged, it shall be modified prior to implementation to incorporate County trail map revisions necessitated during the GIS digitization process. These revisions are included in the next appendix section and are titled **“Ramona GIS Map Revisions.”** Once the **Ramona Trails Map Index** is modified to include the County revisions, it will accurately correspond with the digitized trails map.
